M Mohamed Muharis

Chennai, India

7305397904 mohamedmuharis7@gmail.com LinkedIn GitHub

Summary

Aspiring AI and Software Developer with experience in Machine Learning, Computer Vision, Python, and AI application development. Skilled in developing real-world AI solutions using YOLO, OpenCV, CNNs, and MobileNet, with experience building offline-first applications for challenging environments. Strong foundation in problem-solving, software development, and technical leadership, with experience leading teams and initiatives as President of Beta Bots.

Education

SRM Institute of Science and Technology, Ramapuram 2023 – 2027
B.Tech in Information Technology — CGPA: 9.44/10 *Chennai, India*

National Matriculation Higher Secondary School 2022 – 2023
Class XII — State Board: 75.1% *Tamil Nadu*

National Matriculation Higher Secondary School 2020 – 2021
Class X — State Board: Pass *Tamil Nadu*

Technical Skills

Programming: Python, C++, C, Java, SQL
AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, YOLO, CNN, MobileNet
Web Technologies: Django, HTML, CSS
Databases: SQLite, Firebase
Tools: Git, GitHub, OpenCV, Roboflow, Google Colab, VS Code
Core: Data Structures & Algorithms, DBMS, Problem Solving

Experience

Beta Bots Club, SRM Institute of Science and Technology 2025 – Present
President *Chennai, India*

- Lead a student-driven technical club focused on innovation, coding, AI/ML, and problem-solving.
- Organize workshops, hackathons, seminars, and technical activities for students.
- Foster leadership, collaboration, and technical skill development among club members.

Beta Bots Club, SRM Institute of Science and Technology 2024 – 2025
Treasurer *Chennai, India*

- Managed club resources and supported the coordination of technical activities and events.
- Collaborated with student teams to execute club initiatives and technical programs.

Projects

JALSETU AI | Python, YOLO, OpenCV, MobileNet, CNNs, Firebase *GitHub*

- Developed an offline-first AI application for real-time fish detection, species classification, freshness analysis, and weight estimation for coastal fishermen.
- Integrated YOLO, MobileNet, and CNN-based deep learning models for fish identification and quality assessment.
- Implemented computer vision techniques for fish weight estimation and freshness scoring.
- Designed the application to operate effectively in low-network coastal environments.

Digital Cognitive Fatigue Analysis and Mitigation System | Flutter, Flask, Firebase, Machine Learning *GitHub*

- Developed an AI-based system to analyze digital usage patterns and estimate cognitive fatigue from browsing behavior.
- Monitored continuous screen usage, late-night activity, tab switching, and browsing patterns to identify fatigue indicators.
- Integrated machine learning with a Flask backend to generate fatigue assessments and awareness alerts.
- Designed mitigation features including break reminders, focus mode, and controls to reduce distracting content consumption.

Worker Safety Detection System | YOLO, Python, Roboflow *GitHub*

- Developed a YOLO-based computer vision system for real-time worker safety equipment detection.
- Created and trained custom datasets to detect safety helmets, gloves, and protective equipment.

- Used Roboflow for dataset annotation, preprocessing, and model preparation.

Smart Attendance System | Python, OpenCV, SQLite *GitHub*

- Developed a face-recognition based attendance management system using Python and OpenCV.
- Integrated facial recognition with SQLite for automated attendance recording and data storage.
- Implemented database-based storage and retrieval of attendance records.

Achievements

- **Smart India Hackathon 2025 — Finalist:** Selected as a finalist in SIH 2025 for developing JALSETU AI, an AI-powered fisheries solution in collaboration with ISRO. View
- **Hacknight25 — Runner Up:** Secured Runner-Up position for the Worker Safety Detection System. View
- **InnoHack'26 — Runner Up:** Secured Runner-Up position for the Online Quality Monitoring System for Medicines & Medical Consumables. View
- **Research Paper Presentation — 17th ICSIE 2026:** Presented the research paper "CogFat: A Digital Cognitive Fatigue Analysis and Mitigation System" at the 17th International Conference on Science & Innovative Engineering 2026. View
- **President — Beta Bots:** Leading technical initiatives, workshops, hackathons, and student activities at SRM Institute of Science and Technology.

Certifications

- NPTEL — DBMS View
- NPTEL — Big Data Computing View
- Great Learning — Data Structures in C View
- NSIC — Web Development View

Volunteering

SRMIST TEXUS'25 Mar 2025
Event Coordinator *Chennai, India*

- Supported student engagement and technical event management activities during TEXUS'25.

Conferences & Workshops

UmagineTN — Government of Tamil Nadu, Department of IT & Digital Services

Jan 2025

Chennai Trade Centre, Nandambakkam

Languages

English (Professional Working Proficiency), Tamil (Native Proficiency), Japanese (Elementary Proficiency)
